Serious trucks.™

THE END OF COMPROMISE HAS BEEN ACHIEVED.

You don't want the almost right truck. You want the right truck. Which is just another way to say a Western Star.[®] It's designed to flat out work, every single day. No excuses. No complaints. That's because this is the work truck that was built to be a work truck. And we have a whole family of them that can be customized to do whatever you need.

In fact, a Star is so well-built, it's going to keep running long after the others stop. And the low cost of operation you get over the life of your Western Star makes it a true long-term investment. That's how we've been doing it since we built our first one over 40 years ago. With this kind of value, no wonder Stars are the trucks real pros turn to.

Body builder friendly.

We make trucks with the body builder-specific options that are designed to reduce installation time and ensure years of trouble-free operation. Plus, since we build each truck to your specifications, anything is possible. Pre-punched frame rails, front frame extensions, point-to-point power distribution, ample room between the seats to install controls – the list goes on. Just ask your dealer.

A NICE PLACE TO CALL WORK.

The cab of the Western Star is built to make the job easier and more comfortable. Large, waterproof switches that let you work with gloves on. A quiet, insulated cab that's easy to get in and out of. Greater visibility. More leg room. More storage. More space between seats. Your drivers might feel spoiled. Almost.

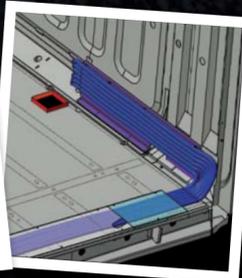

SET FORWARD OR SET BACK. YOUR CHOICE.

Whichever model you need, with Western Star, you decide on front axle placement. Specify set back (SB) front axles for maximum maneuverability or choose set forward (SF) to maximize bridge law formulas.

LET IT SNOW.

When you're operating a plow, you don't want snow getting into your engine. In-cab controlled snow doors with optional underhood air cleaners keep snow out in the harshest conditions, so you can stay working.

WIRING MADE EASY.

Our new 4700 features a number of body builder-friendly features that make connections easier. Like in-cab wiring and interface connectors. A bolt-in pass-through plate in the cab floor to eliminate unnecessary drilling. And a dedicated floor channel with an easy-to-remove top that provides plenty of room to run your own wiring. Like we said, easy.

READY, WILLING AND MORE THAN ABLE.

Western Star trucks are built to perform, with the high-quality components that stand up to the challenge of hard work. Sure, you can buy a less expensive truck. But that only costs you in the long run.

All hail the steel cab.

No aluminum or rivets here. Our galvanized steel cabs are built to keep you safe. Extra gussets and reinforcements, bonded instead of riveted, precision welded for strength, then dipped and protected with a 17-stage e-coat process for long-lasting corrosion resistance and a superior paint finish. Strength and longevity are the goals. We'd say they've been exceeded.

The answer is yes.

The question, well, you'll have to supply that. With thousands of options and a work force dedicated to hand building the truck you need, Western Star delivers true factory customization all backed by a single factory warranty. If there's something you need, just ask.

Close enough just isn't good enough.

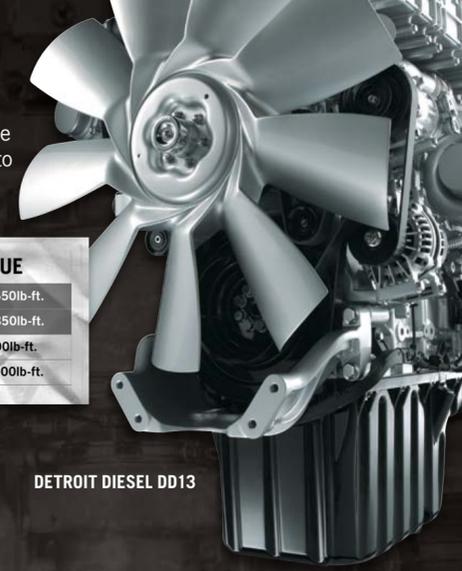

When it comes to choosing an engine, close enough should never enter the conversation. So for municipal applications, we offer a variety of engines with horsepower and torque ratings to match your job. Getting what you want has never been easier.

ENGINE	HORSEPOWER	TORQUE
DETROIT DIESEL DD13*	350-450	1250-1650lb.-ft.
DETROIT DIESEL DD15*	455-560	1550-1850lb.-ft.
CUMMINS ISC	260-350	660-1000lb.-ft.
CUMMINS ISL	345-380	1150-1300lb.-ft.

EFFICIENCY. JUST ANOTHER WAY TO MAKE YOU SOME MONEY.

With BlueTec® emissions technology, you get everything you need to run profitably. Great power, dependability and up to 5% better fuel economy.*

DETROIT DIESEL DD13

EASY MAINTENANCE. GREATER UPTIME.

A Western Star is engineered to be simple to work on. From changing air filters or replacing fuses to accessing major components, a Star is made to keep you on the road and running.

ALL CONDITIONS ARE WORKING CONDITIONS.

A Western Star is built to perform no matter how hot or how cold. So you'll find options like heated windshields, arctic wiper blades and access hatches in the hood to keep you running even when the conditions are less than ideal.
