

Serious trucks.™

WESTERN STAR

Trucking ... it's not a game. It's your life. Your livelihood. It's serious business.

The rewards are great. But to make it work, from the assembly line to the bottom line, takes road smarts and commitment. It takes engineers like ours knowing what professionals like you need — and an OEM like us willing to build it.

Western Star. We build trucks as if your living depends on it.

OLD WORLD CRAFTSMANSHIP

is standard at Western Star.

Every truck is custom-built to your unique specifications. The greatest benefit of Western Star quality and customization is the truck's ability to perform well in response to the terrain, climate and applicational requirements.

If You Want It, We'll Work To Build It.

Western Star Cab

If your business calls for a truck, there's no better place to work than inside a Western Star. This is one serious cab — putting steel between you and the road.

Known for its roominess and quiet ride, it takes all the punishment the job can dish out ... while pampering you with its ride.

Isn't that what a premium truck is supposed to do?

Premium Highway

Western Star trucks are a combination of beauty and brawn, style welded to steel — offered in a wide choice of axle, hood and sleeper configurations, including both the smallest and the largest walk-through sleepers on the road, our premium Star Light Stratospheres, featuring the new 82" Ultra High Roof.

Logging

We made our reputation with a can-do attitude toward any custom request. Popular logging options include a severe-duty cab, tridem drive rear axles, heavy-duty suspensions a variety of radiator sizes and a wide range of logging bumpers.

Construction

Construction sites destroy trucks. Western Star can help ... with shot-peened steel frames able to take the abuse, and options like a severe-duty cab, all-wheel drive and other premium components. The Western Star cab can be custom spec'd with new technologies that offer the highest level of durability and weight-savings.

Extreme Duty

In situations where the ordinary rules of tonnage and terrain cease to apply, it's prime Western Star territory. You go where other trucks won't. We work where other trucks can't.

Every component can be severe-duty certified. We can spec' up to 8x6 axle configurations, all-wheel drives, twin steers, planetary axles and quadruple frame rails for practically limitless load-bearing strength, and more.

Specialty Applications

Western Star's specialty: snow plows, wreckers, rescue vehicles, utility trucks, twin-steer, all-wheel drive, right-hand drive, two- and three-stage air cleaning systems, extra heavy-duty electrical systems 4x2, 4x4, 6x4, 8x4, 8x6, 8x8 or 10x6 — if you want it, we'll work to build it.

Over 300 Western Star Dealers

Our dealers are ready with outstanding parts and service. They are supported by 7 parts and service parts distribution centers strategically located in the U.S. and Canada. Many are open 24/7.

- Roadside Assistance is available 24/7 by calling 1-866-850-STAR

Custom Financing
